

Instruction

Summer School

The District generally offers to students summer programs K-12 that provide enrichment programs, remedial instruction, and senior high school original credit courses.

The summer school program philosophy adopted by the Board states that the District believes:

1. Learning is a continuous process in the growth and development of students.
2. The summer school program can be a valuable adjunct to, and consistent with, the regular educational experience of students.
3. The summer school program can offer unique opportunities not feasible during the traditional school year.
4. The summer school program can be valuable for students with special requirements, interests or disabilities.

PROPOSED GOALS

I. Cognitive

- A. Reinforce and improve basic academic skills, including make-up courses.
- B. Promote measurable achievement.
- C. Improve study habits.
- D. Correct learning disabilities.
- E. Minimize learning loss.
