

## Instruction

Curriculum Revision

The Department of Curriculum and Instruction will develop and maintain a schedule of curriculum revision for pre-kindergarten, elementary school, middle school and high school subjects. The schedule will include a revision year for each subject once each three years. A three-year cycle does not imply new materials will be chosen every three years. The expectation is a change in materials will be on a six-year cycle. The orderly review and revision of courses within each department will occur in a manner which will spread the resources needed for curriculum revision as evenly as practicable over each year of the program review cycle.

The Chief Academic Officer, Executive Director of Curriculum and Instruction, or his/her designee will establish a procedure to help assure that the necessary planning and care are carried out.
